Authors and reviewers from the beginnings of the magazine

The “Revista Cubana de Ciencias Forestales”

was created from a proposal by the Center for Forestry Studies (CEF), attached to the Faculty of Forestry and Agricultural Sciences of the University of Pinar del Río “Hermanos Saíz Montes de Oca” with the purpose of contribute to the dissemination and promotion of the main results of Cuban science in the forestry area and to the dissemination of new knowledge within the scientific community and professionals of the forestry branch.

This project came to fruition with the publication of the first issue of the magazine in July 2013, marking ten years since its release.

It is considered necessary to recognize the work of the editorial team in its beginnings and those who have joined over these years to facilitate scientific communication of researchers and professionals linked to the development of Forest Sciences throughout the country and different regions of the country, as well as people and institutions that are interested in the subject and problems of forestry development.

It is also necessary to highlight the institutional support of the Vice-Rector for Research and Postgraduate Studies and the Department of Publications that allowed this project to be carried out, as well as that of the authors who trusted the journal and allowed the first issue to be published and continue collaborating as authors or reviewers.

The collective work has allowed the incorporation of the journal into important Citation Indexes, specialized Catalogs, Directories and Portals for the dissemination of scientific production, raising the level of the journal, where the work of the reviewers has been decisive.

Below, we list the members of the editorial group and reviewers who contributed with scientific rigor to the review of the manuscripts managed by the journal during the decade.

We thank editors, authors and reviewers for their valuable collaboration during these years and hope to be able to count on their valuable contributions
